PROFILE

Jr. Software Developer with a driven curiosity for sound UI/UX design with an efficient and dynamic code. Continuously learning to enhance my skill set and provide value to my team/organization.

PROJECTS

Gamer's Lodge — *View Project* *View Code*

- Gamer's Lodge is a hub for all types of gamers to learn, explore and shop. It focuses on providing users the latest industry news, game guides, reviews, and a store filled with gaming equipment.

- Gamer's Lodge also allows users to find a coach to take their skills to a professional level. Each week an upcoming gamer is highlighted with a personal bio and also their recent highlights.

Tools: Html5, CSS3, JavaScript, and Bootstrap4

Wise Trivia — *View Project* *View Code*

- A trivia app redesigned, that uses Open Trivia DB's Api to generate questions for the user. These questions differ based on the difficulty the users choose.

Tools: Html5, CSS3, JavaScript, and Bootstrap4

Pocket Alexandria — *View Project* *View Code*

- An app that uses Google Books Api to allow the user to search through their large database of books.

Tools: Html5, CSS3, JavaScript, and Bootstrap4

Zephyr Weather — *View Project* *View Code*

- A weather app that uses a public Api in order to give the user their local weather based off their location.

Tools: Html5, CSS3, JavaScript, and Bootstrap4
